NOVITÀ NEWS

Nuove finiture, rivisitazioni e materiali inediti sono i protagonisti del catalogo Romagnoli 2020 che racconta il progetto attraverso un nuovo linguaggio, pur mantenendo lo stile inconfondibile dell'azienda.

Le collezioni 2020 sono frutto della ricerca continua che si svolge all'interno di Romagnoli design LAB, il laboratorio creativo dove le idee prendono forma e dove nasce l'innovazione tecnologica e la ricerca stilista.

New finishes, reinterpretations and new materials are the protagonists of the Romagnoli 2020 catalogue which tells the project through a new language, while maintaining the unmistakable style of the company. The 2020 collections are the result of continuous research that takes place in Romagnoli design LAB, the creative laboratory where ideas take shape and where technological innovation and designer's research are born.

Innovazione, design e qualità: Romagnoli design LAB

Il Centro di ricerca & sviluppo rappresenta l'identità di Romagnoli. Un laboratorio creativo sempre in evoluzione e luogo di scambio fra le diverse esperienze.

Ricerca e tecnologia rappresentano i due elementi strategici. La tecnologia si sviluppa attraverso la continua sperimentazione di nuovi materiali e tecnologie che, data in mano ai designer possono esprimere la loro visione creativa in linea con il dna dell'azienda.

Innovation, design and quality: Romagnoli design LAB

The Research & Development Center represents the identity of Romagnoli. A constantly evolving creative laboratory and a place of exchange between different experiences.

Research and technology are the two strategic elements.

Technology develops through the continuous experimentation of new materials and technologies that, given in the hands of designers, can express their creative vision in line with the DNA of the company.

Un servizio esclusivo: Romagnoli e il mondo del contract

Fa parte di Romagnoli design LAB anche la divisione progettazione e contract, un servizio esclusivo dedicato ai professionisti del mondo contract che, grazie all'esperienza dell'azienda possono richiedere soluzioni personalizzate per progetti estremamente eterogenei fra loro: da forniture medio-piccole, come residenze a grandi complessi, come alberghi. Romagnoli contract è inoltre in grado di proporre e realizzare anche tipologie di prodotto diverse dalla porta tradizionale e porta REI, come boiserie, parquet, cabine armadio, mobili contenitori e complementi di arredo. La divisione è prima di tutto un fornitore di servizi: dal progetto ad ogni fase della realizzazione, il concetto di problem solving è sempre prioritario nei rapporti con la committenza.

An exclusive service: Romagnoli and the world of contract

The design and contract division is also part of Romagnoli design LAB, an exclusive service dedicated to professionals in the contract world who, thanks to the company's experience, can request customized solutions for extremely heterogeneous projects: from medium to small supplies, such as residences to large complexes, such as hotels.

Romagnoli contract is also able to propose and realize different types of products other than doors, such as walk-in wardrobes, storage units and furnishing accessories.

The division is first and foremost a supplier of services: from the project to every phase of the realization, the concept of problem solving is always a priority in relations with the client.

Superfici tridimensionali e geometrie semplici raccontano il concept della collezione Lievito. Il design tridimensionale aggiunge profondità alle superfici piane, portando dei pattern decorativi unici nell'ambiente.

The concept of the Lievito collection is described by three-dimensional surfaces and simple geometries which adds depth to flat surfaces, bringing unique decorative patterns to the environment.

Romagnoli pone la stessa attenzione che rivolge al legno anche verso gli altri materiali. Nascono così inserti metallici la cui superficie è lavorata a mano per esaltarne la preziosa natura.

Romagnoli pays the same attention to wood as well as to other materials. In order to enhance their precious nature, the metal inserts are created whose surfaces are hand-made.

W02 Grey RAL 9002

La collezione New Classic Sculture è l'esempio di quanto la porta classica in legno massello dimostra di essere sempre al passo con i tempi, anzi diventa una tendenza di arredo. Un tocco classico in un ambiente contemporaneo è l'accostamento vincente per ambienti equilibrati e raffinati.

The New Classic Sculture collection is an example of how the classic solid wood door proves to be always a footprint in time, rather it becomes a furniture trend. A classic touch in a contemporary setting is the prominent combination for balanced and refined environments.
